

ST-400

2-SHAFT SHREDDER

Heavy Duty Shredder meant to reduce large and oversized items to a specific shred size.

The ST-400's applications include solar panels, auto and truck tires, ore, metals, plastic and e-waste. It does more so you can do MORE!

STANDARD FEATURES

▶ CUTTING CHAMBER

The ST-400 shredders are available in four large cutting chamber sizes, 46" x 53", 46" x 65", 46" x 76" and 46" x 87".

▶ KNIVES

Shred-Tech Engineers have designed each knife profile and configuration to suit the application for maximum throughput and optimum shred size.

▶ DRIVE SYSTEM

The ST-400 shredder is available with dual 75, 100, 125 or 150HP electric motors.

▶ CONTROL PANEL

The ST-400 control panel, designed and fabricated by certified Shred-Tech technicians, features HMI touch screen, keyed power switch, fused lockable disconnect, hour meter and a programmable logic controller for shredder functions, including knife reversal on overload.

▶ HOPPER AND STANDS

Quality is evident in the workmanship of Shred-Tech's extra heavy duty stand and hopper. As an option, the stand and hopper can be modified to suit the application or installation.

▶ HEX SHAFTS

The unique design of the machined hex shafts maximizes knife placement options and allows for easy knife removal and machine maintenance. Size for size, the hex shaft is several times stronger than a keyed shaft. The Shred-Tech hex shaft drive system offers the highest knife-tip cutting force of any comparable shredder on the market.

The ST-400 has the largest cutting chamber of all the Shred-Tech ST Models.

- Pneumatic or hydraulic ram
- Custom stands and hoppers
- Feed and discharge conveyors
- PLC interfacing for peripheral equipment
- Explosion-Proof motors
- Modem capabilities
- Hydraulic drive options
- Magnetic or eddy current separators

Maintenance

Experience the next level of convenience and heightened shredder durability with the ST-15, integrating proven design refinements taken from Shred-Tech's in-field system installations. Our durable steel body design, coupled with bulkhead walls and labyrinth barriers at both ends of the cutting chamber, not only ensures exceptional bearing and seal protection but also delivers unmatched durability and elevated serviceability. Effortlessly dismantle the cutting chamber with the help of sectional cleaning fingers, which can be easily removed from the top, along with a lightweight chamber plate.

Streamline your maintenance process and replace bearings or seals without the need of gearbox disassembly. Elevate your shredding experience with a machine designed for lasting performance and hassle-free maintenance. Every Shred-Tech is built to run for years to come.
