

CT9: Heavy Duty Semi Automatic Core Cutter

Designed for very heavy-duty applications, the CT90 offers excellent cut quality and tolerances. It is virtually maintenance free, with a 20 year proven track record of its predecessor.

CT9:

The **CT9** is a versatile heavy-duty core cutter. IT is able to handle internal diameters from 1" - 12" makes it the most versatile manual core cutter available in the market. It comes standard with a manual core advance system that allows the operator to advance the parent core without leaving the cutting station. It also comes standard with pneumatic cutting action.

The **CT9** is quite simple to operate. Once you slide the parent core onto the mandrel, the operator sets the end-stop (a limit switch), which determines the width of the cut cores. The operator then presses the start button, activates the pneumatic cutting action and cuts the core. Advancing the core is done manually by turning the core advance handle, which is located within reach of the operator for added comfort and ease of use.

Features:

- 3/4 horsepower, 120 volt motor
- 60", 90" or 120" parent core length capability (Longer lengths available upon request.)
- 1" – 12" internal diameter capability
- .625" maximum wall thickness
- .250" minimum cut core width
- .010" cut core width tolerance
- 5 minute core size conversion process
- Clean and square burr-free cuts
- Built-in reference scale
