GBC SUREBIND SYSTEM 2 BINDING

A totally secure, tamper proof binding method.

9707051

Overview

The SureBind System 2 is a moderate volume, strip binding machine. This electric punch and bind system combines power with space efficiency. This machine can bind securely documents up to 500 sheets.

Description

The SureBind System 2 is a moderate volume, strip binding machine. This electric punch and bind system combines power with space efficiency.

The System 2 is capable of binding secure A4 or A5 documents up to 500 pages making it ideal for medium offices with moderate volume requirements. Surebind™ 10-prong is the preferred choice of office professionals requiring permanently bound, tamper-proof legal or contractual documents.

Binding is so easy with the System 2 - Punch your document more efficiently with the electric one touch push button. Once the SureBind spine is pushed through the page holes the document is automatically welded securely in place by the SureBind System 2. The ready light indicates when the document is complete.

Page changing is only possible if the weld is broken with the use of a de bind tool which is provided with every machine.

In addition, the Surebind™ 10-prong format allows the secure re-binding of 21-hole documents originally bound using CombBind. This is a very useful feature when moving from the first draft of a document to the final, secure version.

Features
