Engine Winterization: Inboard: R&R fuel/water separator filter, stabilize fuel, flush, drain cooling system, run no-toxic anti-freeze throughout cooling system, fog, spray engine w/corrosion protection and disconnect batteries.

- Inboard/Outboard – Same process as inboard, plus prop shaft & transom assy fittings greased and gear lube change.
- Labor only All parts additional

Outboard Motor Winterization: R&R fuel/water separator filter, stabilize fuel, flush, fog, spray motor with corrosion protection, change gear lube, grease prop shaft & fittings. Parts additional

Engine Oil and Filter Change: We highly recommend an oil change before winter layup. Leaving dirty/used oil in your engine For months at a time can lead to internal damage.

Outdrive Maintenance: Remove drive, drain gear lube, pressure test, re-fill gear lube, grease u-joints, input shaft, Prop shaft, shift linkages and transom assy fittings. Inspect transom assembly bellows, gimbal bearing, hoses and Senders. Store drive and install in the spring with new gasket and o-rings.

- This service is recommended by the drive manufactures every year

Generator Winterization: Same process as inboard engine winterization.

Air Conditioning Winterization: Drain raw water, run non-toxic anti-freeze through system. Check hoses and thru hulls

Head System Winterization: Drain raw water, run non-toxic anti-freeze through system. Check hoses and Thru hulls.

Fresh Water System Winterization: Drain water, by-pass hot water heater if equipped, run non-toxic anti-freeze through pumps, lines and receptacles. Check hoses and thru hulls.

Raw Water System Winterization: Drain, run non-toxic anti-freeze through pumps, lines and receptacles.

Canvas Storage: Remove boat canvas, heated inside storage.

Outside Winter Storage: Pump out holding tank, if requested

Pressure Wash bottom: pressure wash and clean water line with nontoxic acid wash. \$9.00/ft
