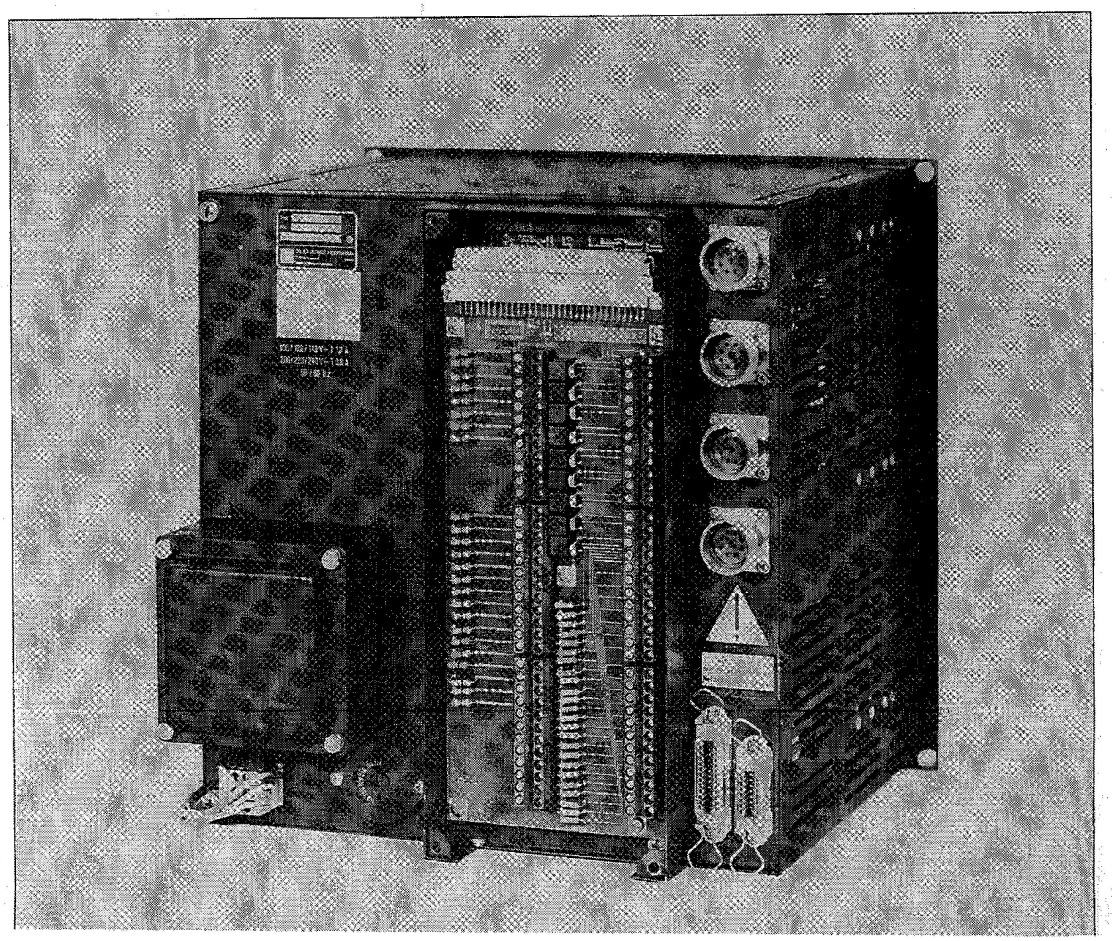
Mounting Instructions and Interchange Circuit Control-Machine

HEIDENHAIN TNC 145 C

Contouring Control



Issue 2/84

Contents

		page
1.	**General remarks**	4
2.	**Technical specifications**	4
2.1	Control inputs	4
2.2	Control relay outputs	4
2.3	Grounding diagram	4
2.4	Transducers	5
2.4.1	Transducers for TNC 145 CS	5
2.4.2	Transducers for TNC 145 CR	5
3.	**Functions of control inputs/outputs**	6
3.1	External buttons "Start", "Stop" and "Rapid traverse"	6
3.2	External switch "Manual traverse" in conjunction with X, Y, Z-axis-release	6
3.3	Feed rate release	6
3.4	Regulator release	7
3.5	M-, S- and T-functions, Strobe signals and feedback signal: "Auxiliary function completed".	7
3.5.1	Output of M-functions	8
3.5.2	Output of S- and T-functions within Tool Call-block	11
3.6	Emergency Stop	14
3.7	Input "Reference end position" and "Reference pulse inhibit"	16
3.7.1	Location of "Reference end position" -cam when using linear transducers	16
3.7.2	Location of "Reference end position" and "Reference pulse inhibit" cams when using rotary encoders	17
3.7.3	Procedure for traversing over reference mark in an axis	18
3.8	"Software limit switches"	18
3.9	External direction buttons and external feed rate potentiometer	19
3.10	Control in "Automatic" mode	19
3.11	Lock "Spindle on"	19
3.12	Output "Control in operation"	20
3.13	Input for electronic handwheel-servo	20
3.14	Nominal value-outputs	21
4.	**Clamping and switch-over of axes**	22
5.	**External data input/output**	23
5.1	V.24-Interface	23
5.2	Input of the Baud-rate	23
6.	**HEIDENHAIN ME 101/ME 102 Magnetic tape cassette units**	25
6.1	Connection cables	25

page

7. Operation set-up 27
7.1 Operation set-up check-list 27

8. Explanations for operation set-up check-list, section c) 30
8.1 Buffer battery switch-off 30
8.2 "Right-hand-rule" 30
8.3 Input of preliminary machine parameters 30
8.3.1 Entry flow-chart for machine parameters 31
8.3.1.1 Entry/Readout of machine parameters from TNC 145 C via Magnetic tape unit ME 101 or ME 102 32
8.3.2 List of preliminary parameters 34
8.4 Checking and correction of traversing and counting directions of individual axes 37
8.5 Software limit switch range setting 38
8.6 Optimization of machine positioning with speed pre-control 39
8.6.1 Offset adjustment 39
8.6.2 Fine adjustment of trailing error 40
8.6.3 Acceleration (linear and radial) 41
8.6.4 Oscillation upon acceleration 42
8.6.5 Approach speed 1 µm before nominal position 43
8.6.6 Integral factor X, Y, Z 44
8.7 Optimization of machine positioning with trailing error 45
8.7.1 Offset adjustment 45
8.7.2 Fine adjustment, trailing error 45
8.7.3 Acceleration (linear and radial) 46
8.7.4 K_V-factor X, Y, Z 46
8.7.5 Multiplication factor for K_V and ramp kinking point 47
8.7.6 Integral factor X, Y, Z 47

9. Entry of freely selectable machine parameters 48

10. List of machine parameters including entry value ranges 56

11. Dimensions 59

12. Connections of TNC 145 C 62
12.1 Locations of connections on control 62
12.2 Layout of multipoint terminals 64
