

The official OEM for **CoreTech<sup>®</sup> inc.**  
*parts, service and machines*

### **CT10: Automatic Core Cutter**

Delivers value, speed, versatility and longevity. The **CT10**, has been the **industry standard core cutter** for over 20 years. Built with heavy-duty components to exacting specifications, the **CT10** will continue to produce perfectly cut cores fast and accurate every time for years.

**CT10** is a semi-automatic core cutter with a fully automated cutting cycle. It is well known for its versatility and high throughput. It is also user friendly making it sustain its leadership position for the last 10 years

To load a parent core, the operator switches the selector switch to “Load” and slides the core onto the mandrel. He then advances the core to the end-stop, tripping the integrated micro switch, and switches the selector switch to “Run.” This activates the automated cutting cycle. The knife lowers, cuts the core and the operator advance the parent core against the end-stop to restart the cycle.

### **Features:**

- 60”, 90” or 120” parent core length capability (Custom sizes are available)
- 1” – 12” internal diameter capability
- .625” maximum wall thickness
- .250” minimum cut core width
- .010” cut core width tolerance
- 5 minute core size conversion process
- One minute core width change
- Clean, square burr-free cuts
- Built-in reference scale
- Micrometer end stop adjustment
- Parent core support with loading ram (optional)
