NC-EDM SYSTEMS J Series

(2nd version)

MACHINING CHARACTERISTICS DATA BOOK

MITSUBISHI ELECTRIC CORPORATION©

CONTENTS

1. WORKPIECE AND APPLICABLE ELECTRODE MATERIALS 2

1.1 Setting of electrode polarity (Transistorized power source) 3

1.2 How to use recommended machining condition data 5

2. RECOMMENDED MACHINING CONDITION EXAMPLE CHART 24
a-1 Super low wear orbital conditions example 25
b-1 Low wear orbital conditions example (0.2%) 30
c-1 Low wear orbital conditions example (0.5%) 35
d-1 Low wear orbital conditions example (1.0%) 40
e-1 Super low wear orbital processing condition example 44
f-1 Low wear orbital processing conditions example (0.2%) 49
g-1 Low wear orbital processing conditions example (0.5%) 54
h-1 Low wear orbital processing conditions example (1.0%) 59

3. RECOMMENDED MACHINING CONDITION EXAMPLE CHART 65
a-1 Ultra-low consumption oscillation machining example (Fine surface finishing) 66
b-1 Electrode consumption (0.2%) oscillation machining example (Fine surface finishing) 71
c-1 Electrode consumption (0.5%) oscillation machining example (Fine surface finishing) 76
d-1 Electrode consumption (1.0%) oscillation machining example (Fine surface finishing) 81
e-1 Ultra-low consumption oscillation machining example (Fine surface finishing) 86
f-1 Electrode consumption (0.2%) oscillation machining example (Fine surface finishing) 91
g-1 Electrode consumption (0.5%) oscillation machining example (Fine surface finishing) 96
h-1 Electrode consumption (1.0%) oscillation machining example (Fine surface finishing) 101

4. TABLE OF RECOMMENDED WORK CONDITIONS 107
(1) For G35 and G70 power supply 108
a-1 Ultra-low consumption oscillation conditions example (0.5% or less) 108
b-1 Ultra-low consumption oscillation conditions example (0.5%) 112
c-1 Ultra-low consumption oscillation conditions example (1.0%) 116

(2) For G140 power supply 120
d-1 Ultra-low consumption oscillation conditions example (0.5% or less) 120
e-1 Ultra-low consumption oscillation conditions example (0.5%) 123

5. ELECTRODE REDUCTION TABLE 126

5.1 Electrode reduction table (Cu:St) 127

5.2 Electrode reduction table (Gr:St) 152

5.3 Master pack list 177
Cu:St (10μRmax) 177
Cu:St (10μRmax) 178
Cu:St (15μRmax) 179
Cu:St (15μRmax) 180
Cu:St (2μRmax) 181
Cu:St (2μRmax) 182
Gr:St (15μRmax) 183
Gr:St (25μRmax) 184
Gr:St (45μRmax) 185
Cu:Al (16μRmax) 186
Cu:Al (8μRmax) 187

Cu:Al (5μRmax) 188
Cu:Al (3μRmax) 189

6. MACHINING CHARACTERISTICS GRAPH 190

6.1 Machining characteristics graph (Cu:St) 191

6.2 Electrode thickness to length wear ratio characteristics (Cu:St) 200

6.3 Corner wear characteristics by machining depth (Cu:St) 201

6.4 Machining characteries graph (Gr:St) 204

7. SDI MACHINING CONDITION DATA (C7) 209

7.1 SDI Machining condition (C7) 211

7.1.1 Machining condition pattern•Selective pattern 211
L9800 Cu-St Low wear machining 211
L9801 Cu-St Low wear machining – Mirror-surface machining (GM-10) 212
L9802 Cu-St Low wear machining – Mirror-surface machining (GM-1) 213
L9820 Gr-St Low wear machining 214
L9830 Cu•W-St High wear machining 215
L9831 Cu•W-Wc High wear machining 216
L9841 Ag•W-Wc High wear machining 217

7.1.2 Machining condition pattern •Selective pattern 218
L9850 Cu-St Low wear machining 6(5) → 2(3) 218
L9851 Cu-St Low wear machining 5(5) → 2(3) 219
L9852 Cu-St Low wear machining 4(5) → 2(3) 220
L9853 Cu-St Low wear machining 6(5) → 1(4) 221
L9854 Cu-St Low wear machining 5(5) → 1(4) 222
L9855 Cu-St Low wear machining 4(5) → 1(3) 223
L9856 Cu-St Low wear machining 3(5) → 1(2) – 6.0 224
L9857 Cu-St Low wear machining 3(2) → 1(2) – 3.5 225
L9858 Cu-St Low wear machining – Mirror-surface machining 3(2) → GM(1-1) 226
L9859 Cu-St Low wear machining 3(2) → SF(1-1) 227
L9860 Cu-St Low wear machining 2(5) → 1(2) – 3.5 228
L9861 Cu-St Low wear machining 3(2) → 1(2) – 1.0 229
L9862 Cu-St Low wear machining – Mirror-surface machining 2(5) → GM(1-1) 230
L9863 Cu-St Low wear machining – Mirror-surface machining 2(5) → SF(1-1) 231

7.2 Schedule of machining program 232

8. E PACK LIST 233

8.1 Table for E pack directory regions 234

8.2 E pack 236
