

Tekniske specifikationer:

- A: 730mm
- B: 400mm
- C: 320mm (model 1120)
- C: 420mm (model 1200)
- C: 470mm (model 1250)

Vægt:

19 kg (model 1120)
25 kg (model 1200)
29 kg (model 1250)

Etiketlængde:

15-400 mm (uden trykværk)

Etiketbredde:

15-120 mm (model 1120)
15-200 mm (model 1200)

Etiketrulle:

Max Ø270mm
Option: Ø400mm

Drivsystem:

200 W DC-motor
via kobling.

Hastighed:

4-22 M/min.
Option: 36 & 56 M/min.

Etiketteringer pr min.:

Max. 300

Elforbrug:

250 Watt

Standarder:

CE

3-roller system for high quality results

3-roller system

High quality results.

Memory for settings.

Orientated label position on products.

Flexible solution.

Strong construction.

Many options.

The 3-roller method of labelling is the optimal way to get a perfect label position on the product, when the label needs to go around a cylindrical container.

The container is stopped and held between 3 rollers, rotated and then labelled. This ensures that the container is standing vertical straight, while the label is applied. The result is, that the label is sitting horizontal all around the circumference.

This method allows also to place the label in an orientated position to a reference

point on the container. This labelling technique can be integrated in many configurations, covering various demands.

A large number of options can be supplied in a system:

- Orientation by mark reader
- Orientation by vision system
- Print on label; Batch, Date, etc.
- Vision control of the printing
- Transparent label detection
- Barcode scanner
- Counters
- Missing label control
- Warning signals
