

# UNSCRAMBLING SYSTEMS

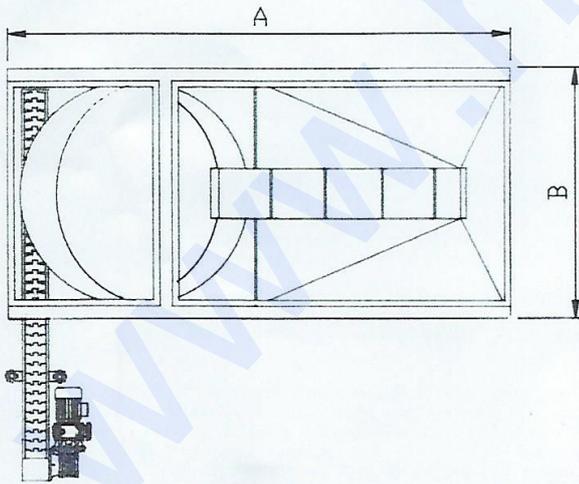

A wide range of container unscramblers for automatic feed can be supplied - up to 300 containers per minute. With large hoppers to limit attendant labour for refilling, and controls to permit linkup with M.S. or other lines.

The machine has been designed and constructed using the finest quality mechanical components to ensure reliable operation in conjunction with minimum maintenance, short change overtime, gentle bottle handling, compact dimensions and hygienic design.

The machine are manufactured in stainless steel construction, with all bottle contact parts in heavy plastic and furthermore the machine are completly covered by heavy P.V.C. glass covers to reduce noise.

All mechanical components are designed to reduce maintenance, and all lubrication is automatic. Main drive is ensured by safety clutch.

Three options are available to control bottles at the discharge, Positive conveyors with vertical fins, which are suitable for the control of unstable bottles, transfer starwheels (timed with the machine) or vacuum conveyor.
