

CARDIOTECH GT-500 PADECG

A MOBILE ECG SOLUTION

PADECG consists of a professional ECG software and wireless ECG acquisition module (compatible with iOS and Android). It provides a mobile solution to meet the demands of caregivers in a mobile treatment environment. Cardiotech's reliable SEMIP® algorithm is also provided, which allows you to have a fast and confident ECG assessment before sending the ECG report to the GT-500 Data Management System for further analysis.

- User-friendly interfaces
- Reliable Interpretation
- Extensive Communication

TOUCH SCREEN

- Operating PADECG is just simple as using your smart phone. Convenient gestures such as long pressing, and dragging are all supported to enable users a better experience.

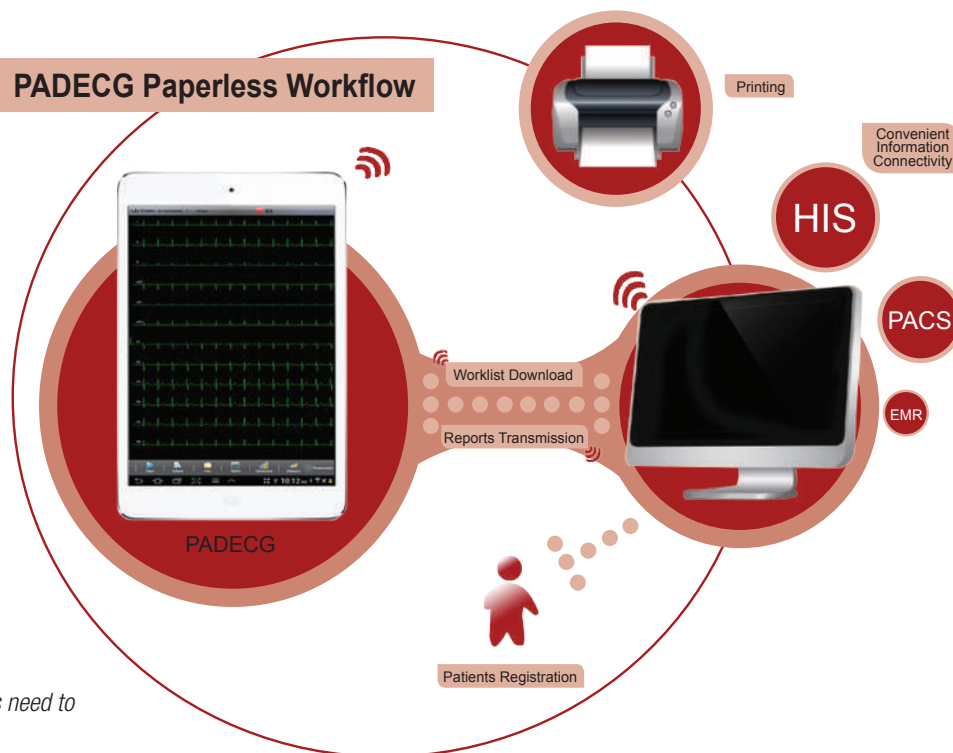

FILTER

- Armed with the comprehensive filters, you can acquire superb ECG traces with full confidence just within several touches.

ALGORITHM

- With Cardiotech's professional ECG algorithm SEMIP®, PADECG gives accurate diagnosis results and offers doctors a reliable reference.

PADECG Paperless Workflow

**Tablet is not included in PADECG. Customers need to purchase tablet themselves.*
