

## Rally 55/55H

### Cold / Hot Carpet Spotter

Innovative and maneuverable, the Rally 55 and Rally 55H are ideal for cleaning up between scheduled carpet cleanings. The built-in handle makes the Rally 55 easy to transport to a problem area at short notice.

#### Two models available

The Rally 55 is a cold water spotter. The Rally 55H adds a heater for additional cleaning power.

#### Easy to empty

The Rally 55/55H has a detachable recovery tank. Use the molded-in handle to carry the 2.6 gallon recovery tank to the nearest drain when needed.

#### Easy to transport

Simply pull out the retractable handle and cart the Rally 55/55H to the job site. The molded-in handle is placed right in the center, making carrying the Rally 55/55H up and down stairs easier. The transport handle slides out of the way when using the machine.

#### Simple to use

Simple operator controls are easily accessible on the back of the machine. The integrated cord wrap is convenient for storage.

#### DO NO HARM

Using heated water when cleaning carpet weakens the physical bond between the carpet fiber and the soil.

Heated water makes cleaning chemicals more efficient, reducing the amount you use.
