

M17 Daily Operational Checklist

Prior to operating the machine there are checks that need to be completed to make sure your machine is ready to clean.

- ☐ Check the battery charge level.
- ☐ Check the operating lights.
- ☐ Check the right side squeegee for wear and damage.
- ☐ Check brushes for wear and damage.
 - Remove any wire, string, or twine that may have become wrapped around the brushes.
- ☐ If your machine is equipped with the ES option: Ensure the ES filter at the bottom of recovery tank is clean.
- ☐ For *ec-H2O* scrubbing, confirm all conventional cleaning agents are drained and rinsed from the solution tank.
- ☐ Check the rear squeegees for wear and damage.
- ☐ Check the solution and recovery tank cover seals for wear or damage.
- ☐ Confirm that the vacuum fan inlet filter is clean.
- ☐ Remove the debris tray, empty it and wash it out.
- ☐ Check the left side squeegee for wear and damage.
- ☐ Check the hydraulic fluid level.
- ☐ Check the condition of the hopper dust filter and seals.
- ☐ Check the steering and braking systems for proper operation.
- ☐ Check maintenance records to determine maintenance requirements.

List below any problems that occurred during operation.
