Application

Spray method

The cleaning water is applied to the floor directly in front of the mop, then the surface is wiped.

Preconditioned method

For optimum results, dampen the mop with cleaning water amounting to 180 % of its own dead weight.

Bucket method

For optimal moisture and a single-step wiping process, dip the mop fully into the cleaning water, allow it to absorb as much water as possible and then wring it out in the press.

Properties

- Low-friction all-purpose mop made of high-quality microfibre
- With pockets
- Low overall weight reduces washing costs
- Can be used with all conventional folding holders (40 cm)

Washing instructions

- Do not wash with other textiles
- Do not use bleach, softener or strongly alkaline detergents
- Washing or drying at high temperatures can damage the fibres
- Thoroughly rinse the textile before washing it
- Please do not dry in the dryer

⁹ Compliance with or use of recommended temperatures and detergents. In addition, the use of a dryer, especially at higher temperatures, may reduce the lifetime considerably.
