COMMERCIAL VACUUMS

BACKPACK VACUUM

Vacuum 60% faster with the BP6 and BP10 HEPA Backpack Vacuums. Extremely high air-flow speeds your cleaning, increasing productivity while reducing costs and effort. Great for use in schools, office buildings, hospitals and high traffic areas. At over 1,300 watts, the vac motor enables removal of fine dust and particles embedded deep in the carpet fibers, while the HEPA filtration helps maintain indoor air quality. Thermal shutoff will protect the vac motor from damage if it exceeds maximum working temperature.

POWER

1,328 W

AIRFLOW

152 CFM

KEY SPECS

1.5, 2.5 gal

HEPA filtration

CERTIFICATIONS
