CYLINDRICAL SCRUBBER

Automatic
Scrubber

CYLINDRICAL CLEANING POWER
AND PERFORMANCE

Item# 99695T

Deep Scrubbing

Cylindrical brushes with concentrated brush speeds of 1300 RPMs and 4-6 times more contact pressure than rotary scrubbers provide deep cleaning to nearly any flat or uneven flooring surface.

Sustainability

The cylindrical scrubbing action utilizes 30% less solution than comparable disk scrubbers and operates at an LEED qualifying 67 dB(A).

Durability

Constructed with a tough roto-molded polyethylene body, long-lasting commercial components and built-in vacuum motor protection against moisture for years of maximum performance and reliability, with minimal machine downtime.

Reduced Waste

Cylindrical brushes far outlast rotary pads, using an average of one set of brushes for every 100 floor pads.

Parabolic Squeegee

Featuring a parabolic squeegee system that delivers 100% solution recovery even on 180° turns and designed to facilitate speedy squeegee changes with a four-sided rear blade with a quick release lever.

Easy Draining

The front-mounted drain hose is easy to access and allows for quick disposal of recovered liquids on the go without the need for a floor drain like competitive models.

Versatile

In addition to the standard brushes included with the machine, four optional brush types are available to enable optimal cleaning on virtually any hard floor surface.

Service Access

The clamshell design improves access to batteries and vac motor, reducing downtime for repairs and maintenance.

Simple Operation

This traction drive, walk-behind scrubber easily glides across the floor and has user-friendly controls with a built-in maintenance meter.
