

ConnectedCooking.

The digital kitchen management solution.

ConnectedCooking.

Your kitchen can do more.

All under control. Always up-to-date. No matter where your cooking systems are. Exploit the full potential of your RATIONAL cooking systems with ConnectedCooking, the free digital kitchen management solution by RATIONAL. Distribute cooking programs, update unit software and document HACCP data on the PC, tablet or smartphone. Making things easier.

Benefits to you.

Simplify workflows.

With one click.

Cost pressures, skills shortages and increasing customer demands are making work in the kitchen more challenging. ConnectedCooking, on the other hand, simplifies work processes with recipe creation, cooking program distribution, automatic software updates and HACCP data downloads. All digitally and with just a few clicks.

Stay in control.

At a glance.

Only those who monitor their processes closely can feel confident and secure, knowing that everything is under control: This includes standardised food production, HACCP documentation and the energy usage of cooking systems. ConnectedCooking makes this a breeze. Everything at a glance, at any time, even from a distance.

Save time and money.

So there is always more.

Optimise the use of equipment. Keep downtime to a minimum. Ensure quality. Transfer data centrally at the touch of a button instead of on site using a USB flash drive. ConnectedCooking not only makes cooking easier, it also makes it more economical. So you have more time and money.

Simplify workflows.

Stay in control.

Save time and money.

Recipe Management. Same standards. Anywhere.

- › Set the standard by creating your own cooking programs and recipes digitally
- › Send cooking programs to networked RATIONAL cooking systems quickly and easily with one click
- › International recipe library with suitable cooking system settings as a source of inspiration

video

Benefits:

Asset Management.

Up-to-date.
All the time.

- › All under control: Dashboard view of energy consumption, service status, cooking system availability and more
- › Always up-to-date with the latest technology through free and automatic software updates
- › Configure unit settings and individual displays via MyDisplay and transfer them to cooking systems with a click - for standards across sites
- › Centralised remote access to cooking systems
- › Push notifications for real-time information (e.g. load or service messages)
- › If a RATIONAL service partner is involved: Technicians also receive automatic fault notifications and can access cooking systems remotely, and ideally rectify faults immediately

Benefits:

Hygiene Management.

Clean and hygienic.
With certainty.

- › View, download and store HACCP data retrospectively for up to six months
- › Create customised cleaning plans via MyDisplay and send them to networked iCombi Pro units with one click
- › Monitor cleaning status and iCareSystem AutoDose cartridge levels on the dashboard*.
