

Unit comes patient ready and includes:

FEATURES:

- Advisory capabilities
- Transport-ready design
- Easy-to-read display
- Low current pacing waveforms
- Flexible color display
- Quick, easy connections
- ZOLL XL Battery for long transport times
- Transport-ready design
- Easy-to-read display
- Full range of parameters for a full range of patients
- Flexible color display
- Quick, easy connections
- Ready to gather and share critical data

The ZOLL M Series Critical Care Transport (CCT) is a defibrillator with AED features. The M Series CCT is small, light, and bright, making it easy to carry to any situation and making the screen visible in any lighting condition. The defibrillator system offers Pacing, 12-lead ECG, SpO2, EtCO2, NIBP, AED, and temperature. The 6.5-inch color LCD screen can show Rectilinear Biphasic waveforms. These are low energy, low current pacing waveforms. Used to optimize the patient's safety, by reducing the muscle artifact and ensuring the patient's comfort. The ZOLL M Series CCT defibrillator can document events and data in its memory or removable PCMCIA cards that can help transfer data through the ZOLL CodeNet data management system.

- A/C Power cord
- NIBP cuff w/ hose
- SpO2 Sensor w/ adapter
- Patient cable w/ leads

- Battery
- Handsfree cable
