Exterior Protection

5-YEAR WARRANTY

- ◆ Weather Induced Fading
- ◆ Weather Induced Chalking

- ◆ Acid Rain
- ◆ Tree Sap
- ◆ Bird Waste

- ◆ Insect Damage
- ◆ Sun's UV Rays
- ◆ Hard Water Spots

- ◆ Ocean Spray
- ◆ Paint Overspray

DID YOU KNOW? Typical wax melts off or dissipates at 120°-140° degrees. VPS Nano Technology protects your painted or gelcoated surface temperature to nearly 500°!

Vantage Protection Systems™ products are sold exclusively through Vantage Resource Group, Inc.
50-Year Legacy of Protective Excellence

It's All About Technology

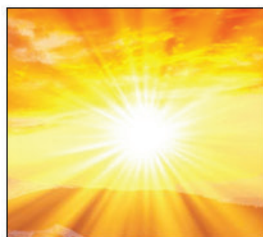

What is it? *Diamond Ceramic*

Diamond Ceramic (patent pending) is the first ever long term protective coating to combine nano diamonds with ceramic technology. The nano diamonds give unparalleled shine and reflection, creating a diamond brilliance finish to your recreational vehicle. The ceramic forms a chemical bond to the surface for outstanding protection. The two technologies together result in a stunning appearance with high levels of gloss, slickness, and reflection.

How It Protects

The "secret" about the comprehensive protection that VPS Products deliver, is simply in the revolutionary technology it is created from. This Nano Technology acts to produce a significant shield for your interior and exterior surfaces of the inevitable impacts from environmental or human elements. It is invisible to the naked eye and will maintain your boats luster and Interior/Exterior for many years.

More of What Some of Our Customers are Saying!

"I just took delivery of my new boat and plan to own it for many years. The Florida sun will burn wax off in a matter of hours and destroy my gelcoat and interior vinyl. Vantage Protection is a small price to pay for the peace of mind it will give me."

"We purchased our boat for the entire family to enjoy. My teenage boys will most likely use it more then we will. Vantage Protection Systems product just made total sense. They can have their fun, but we are still protected."

"If you have ever had mold or mildew in your boat, you know that it NEVER GOES AWAY. This alone is worth the few dollars a month that this protection costs."

Coverage Overview*

The content of this marketing material is limited by its size. The entire terms, conditions and exclusions, including but not limited to, your duties, of the Limited Warranty included in the purchase of the Appearance Protection products are included in the written Limited Warranty before purchasing. The purchase of these products is optional and is in no way a condition to either the purchase or financing (obtaining credit) of a vehicle.

This brochure is simply an overview. For exact provisions, exclusions and limitations, please consult your actual agreement, certificate or waiver.

CUSTOMER TESTIMONIAL:

I am an avid boater that has had many boats over the last 30 years. Our lake is a man-made, constant level lake that is not

considered to be that clean with extremely hard water. My challenge over the years, with each boat, is to keep it as clean and shiny as possible. I have tried many products over the years with varying levels of success. I spend a great deal of time researching car and boat cleaning, waxing and detailing products. Each year I experiment with something new, based on my research, and experience somewhat similar or limited results. From vinegar and water spray, wipe and rinse to expensive water spot remover. All the remedies worked fairly well, but it took a constant treatment to stay ahead of the water spots and contamination of the gelcoat.

With the purchase of a new 2020 Cobalt R3 (with a black hull) this summer, the dealer recommended the Vantage Protection System for both the Exterior and Interior of the boat. Based on the cost and the amount of time it would save me, I researched the product and told the dealership to definitely add it to the boat prior to delivery. I have now used the boat over 20 hours this summer and am constantly amazed at how well the protection is. When I am done boating for the day, I lightly spray some fresh water on the hull and wipe it dry with a clean micro-fiber towel. The water spots and any dirt or grime wipes right off. What used to take me two hours of cleaning and polishing now takes me about 15 minutes to do the entire boat. All without spending a lot of money on expensive and dangerous water spot removers or smelling like a pickle when done.

On one occasion, I wasn't able to completely wipe the boat down at the end of the day and the boat sat on the lift for about 6 days. The water spots had dried and baked in more than I would have liked, so I emailed the Vantage Resource Group to inquire if I could use a light solution of vinegar and water to assist with the removal of the water spots. I received a response from a Customer Service Rep within 24 hours that stated that she had confirmed with the lead chemist that it was OK to use but be sure to rinse the boat well before drying. It worked perfectly and simply. I also washed the boat with the Vantage Soap product that was included in a Vantage Cleaning Kit provided to me just after I took delivery of the boat. The thrill of seeing how clean the boat was cannot be expressed in words, so I have attached a picture.

I can only imagine how well the Interior protection is, since I have not had any issues with spills or dirt. Again, at the end of the day, I use a damp beach towel to wipe over the seats before covering the boat. That takes about three minutes.

I am extremely pleased with the Vantage Protection System for use on my Exterior and Interior of the boat. When considering the price, time saved and fantastic Customer Service, I only wish that I would have known about the product years ago. I have recommended it to every boater that compliments me on how clean and shiny the boat is.

It gives me great pleasure to have boaters walk by my slip and ask what I am using on the boat to keep it so clean and I tell them fresh water in a spray bottle. They can't believe that, so I show them! I love their look of amazement!

Great product! Great Price! Great Customer Service!

Thanks Vantage Resource Group!

West Des Moines, IA

Testimonial:

"Out of all the boats and vehicles that I have claybarred and waxed multiple times, it's crazy how much smoother the Diamond Ceramic ends up being over waxing. And it is much deeper of a look. Like you could stick your finger through the colors of the boat. The pictures don't do it justice. It brought out more of a prism effect in the metallic rather than just a gray sparkle. We just buffed a boat behind it in the shop after some repairs and the smoothness difference is night and day."
