

Product details

Malys® Multiformat

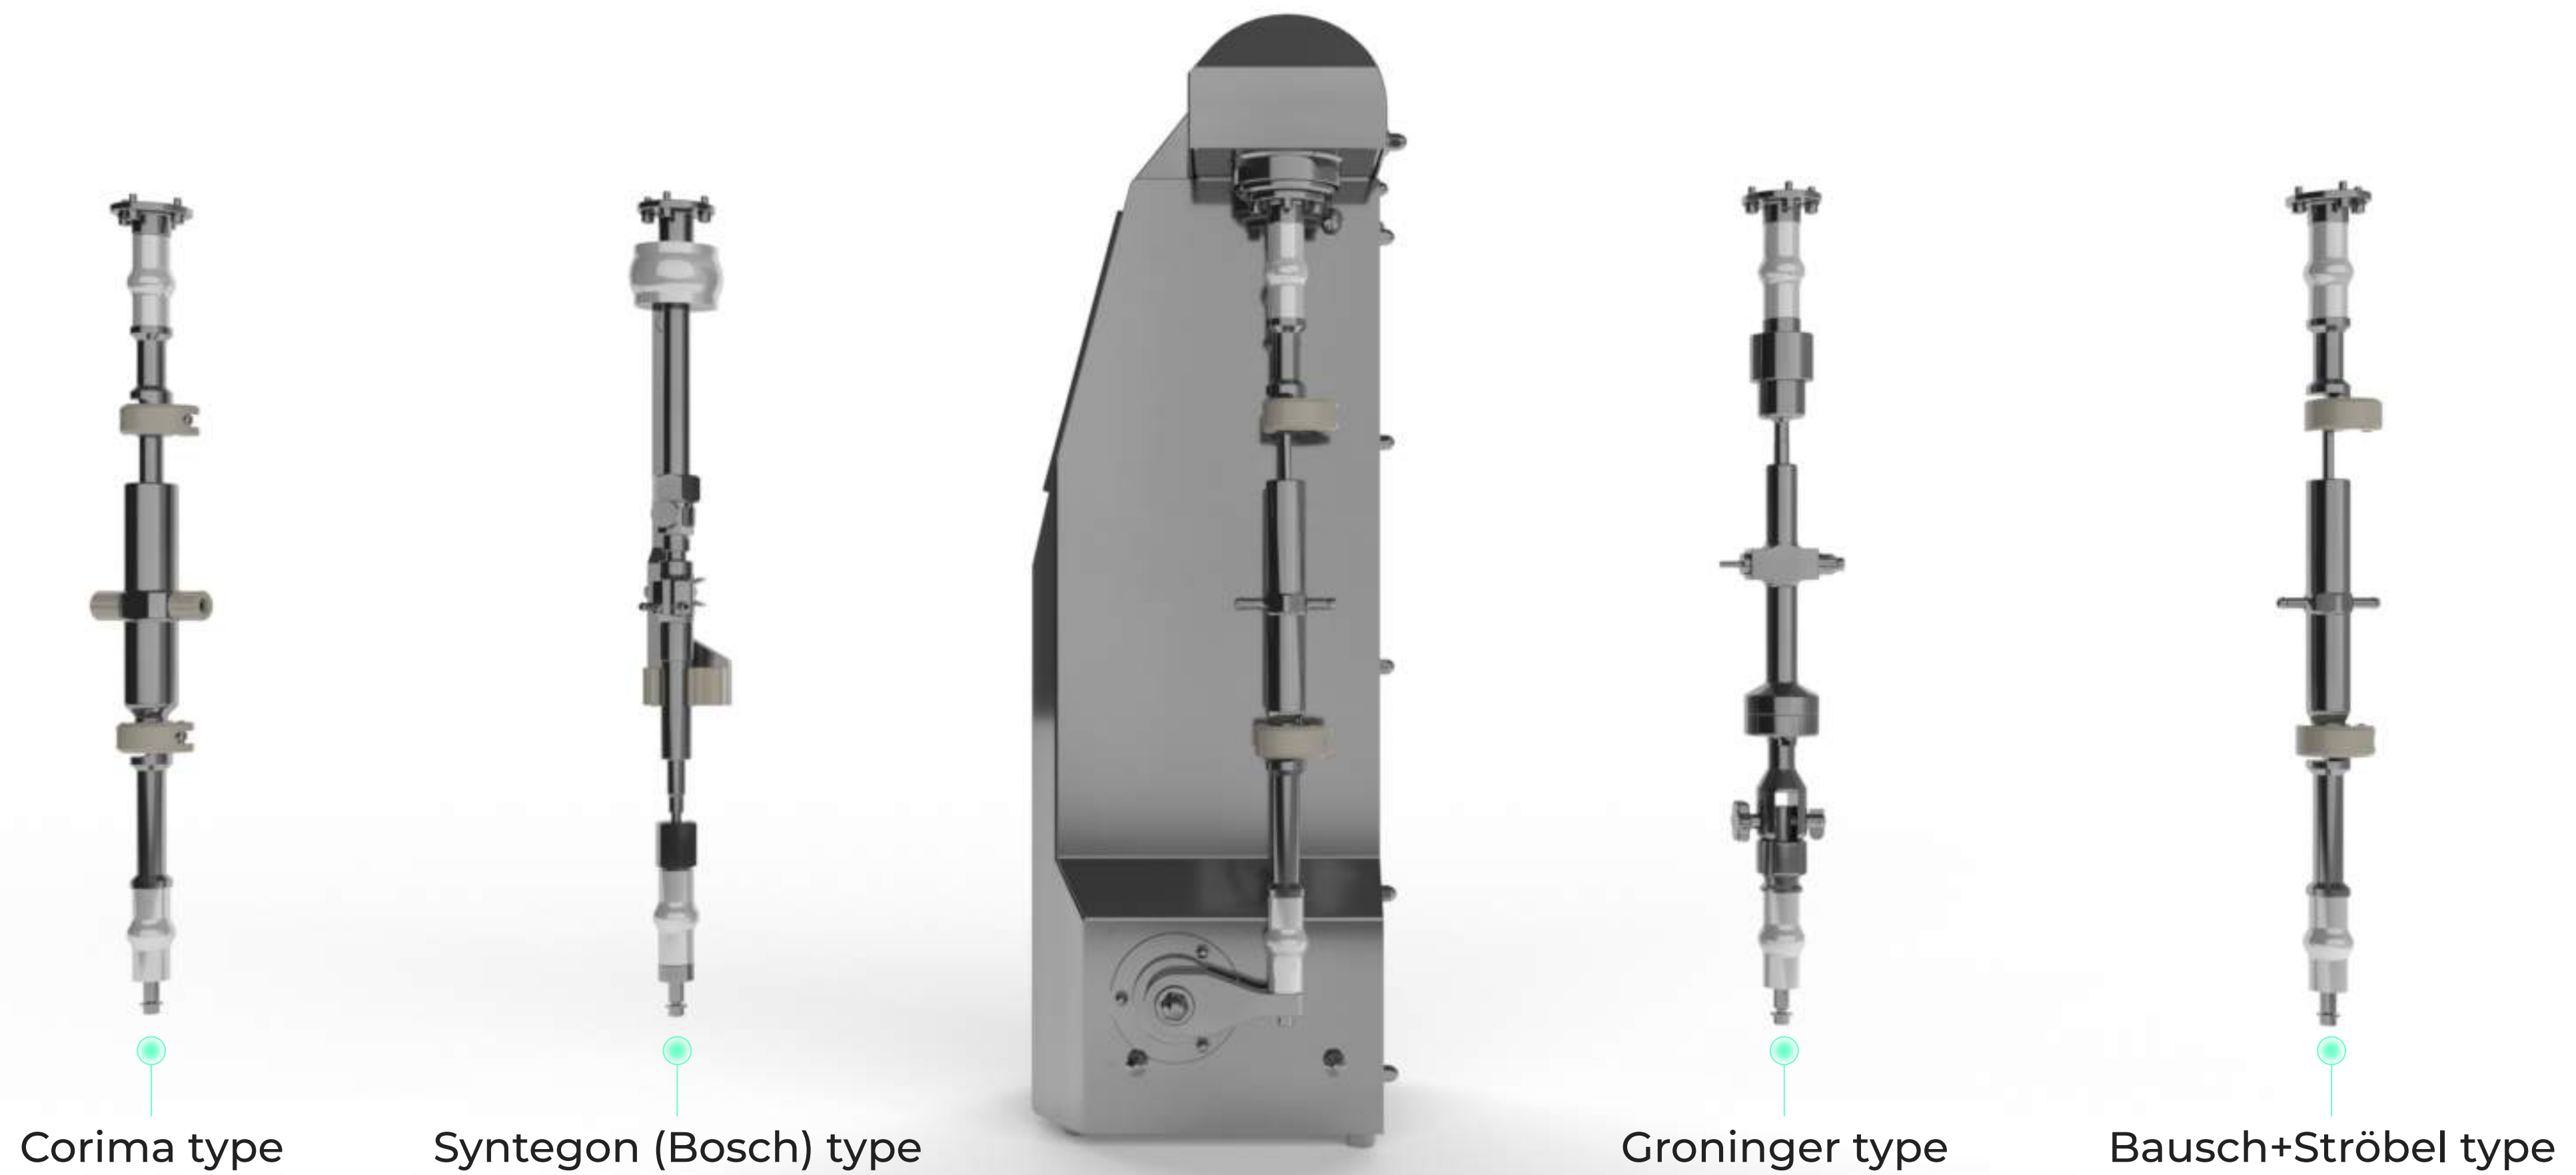

Malys® Multiformat is a table-top **filling machine**, for filling vials, bottles, syringes and nest.

This benchtop machine is able to handle a **large number of products**, from a very fluid liquid to a very thick gel.

- Compact design
 - High accuracy
 - Easy to use
-
- Pharmaceuticals
 - Clinical trials
 - Biopharma

Versatile machine

Suitable for all types of pumps

Our benchtop filling solution allows the installation of all types of dosing pumps available on the market. Feel free to ask us what type of pump you want to use.

- Ideal for R&D, clinical lots, small batches etc.
- Quick changeover of pumps.

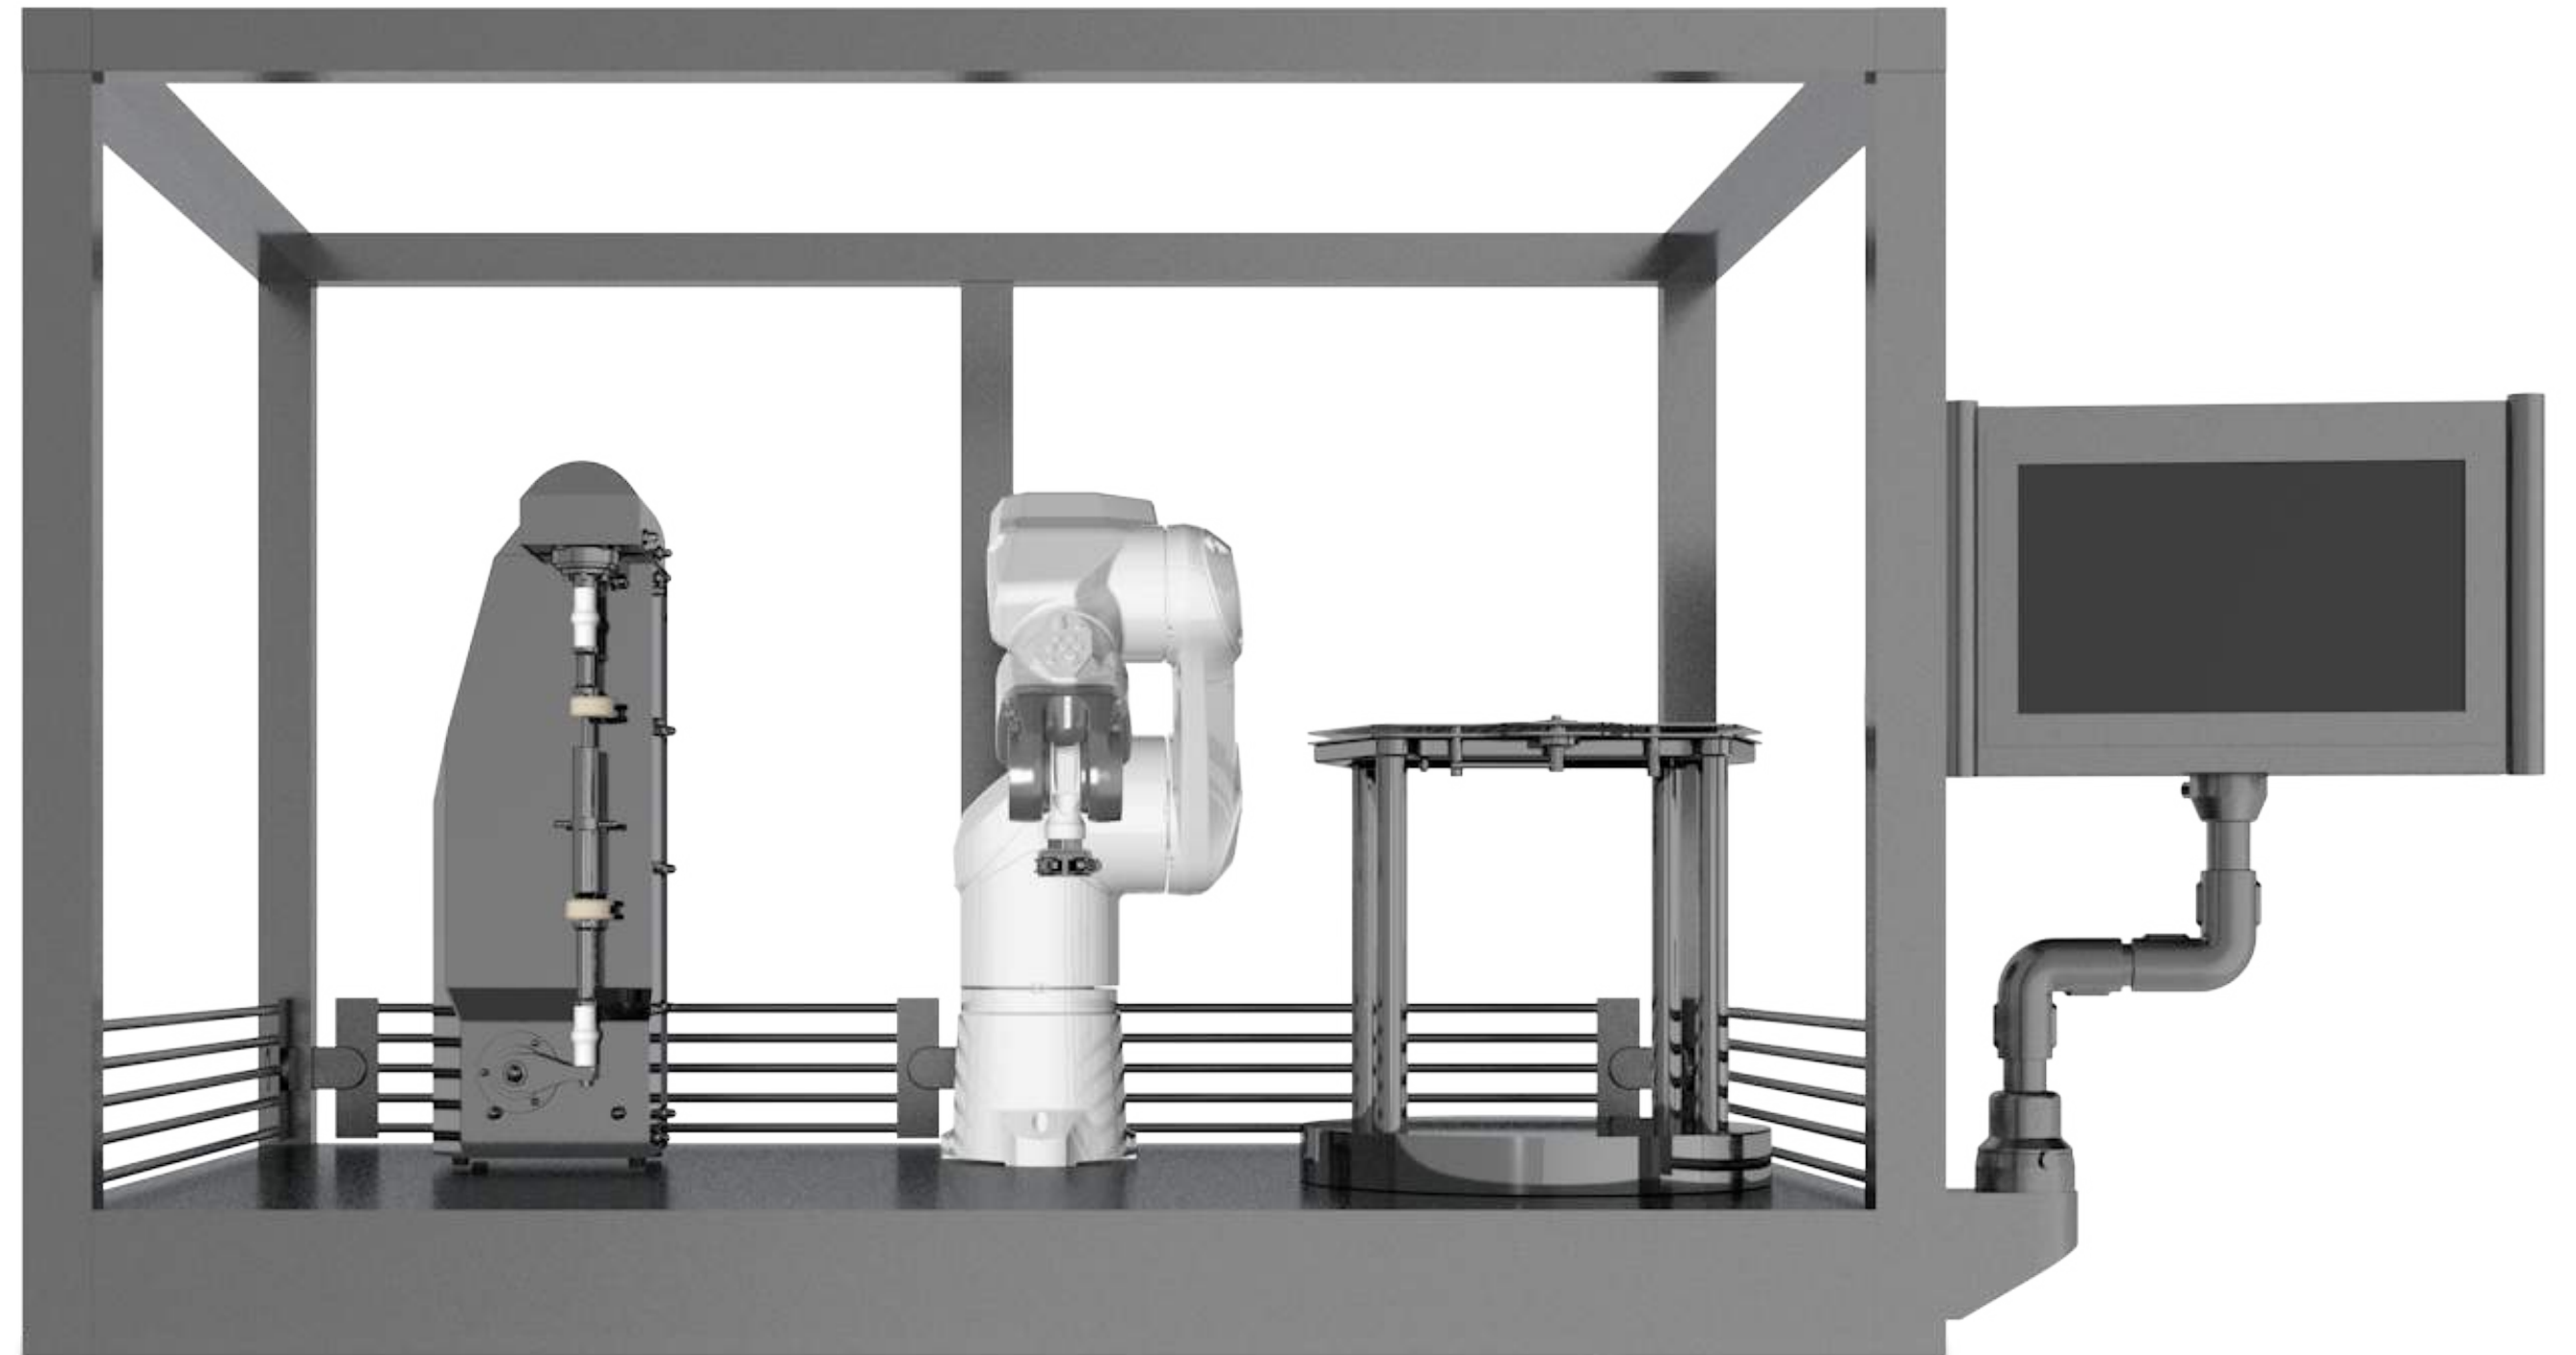

Customized solutions

For integration and aseptic use

Designed to be **integrated into aseptic** equipment, the Malys Multiformat is a **dosing module** compatible for use in **isolators, RABS** or simple **frame** with remote HMI.

As a solution provider for **liquid dosing**, we adapt our machines and accessories to **your constraints**.

-
- Adapted to your existing environment
 - Controllable from centralized HMI
 - Sterile compliant
 - CFR 21 part 11 compliant

Assets & options

Malys® Multiformat

- Stand-alone or revamping version
- Compliant with all type of pumps
- Viscous or aqueous product
- Repeatability rate of +/- 0.1%
- 0.001 mL to 50mL
- Rate up to 6,000 vials/hr maxi
- Minimal maintenance
- Aseptic materials
- Quick format changeover
- Recipes registration
- Compact design
- Friendly HMI
- Compliant CFR 21 part 11

They trust us

French manufacturing since 1902
