Why this platform sells

- Fixtureless probing eliminates dedicated bed-of-nails tooling.
- Suited for prototypes, engineering builds and high-mix production.
- Large-size SL configuration supports oversized PCB applications.

Publicly referenced capabilities

LARGE-SIZE BOARD HANDLING	approx. 660 x 635 mm
REFERENCED TEST AREA	approx. 630 x 609 mm
TAKAYA APT STRENGTH	high-precision fixtureless inspection

Typical buyer fit

- EMS / CM shops
- Aerospace & medical PCB
- Prototype / NPI labs
- High-mix low-volume lines

Information compiled from public Takaya/flying-probe references and user-provided asset details. Specifications, options, software version, accessories, operational status and availability are subject to buyer inspection and seller confirmation.
