

Ling Electronics Electrodynamic Vibration Test System

*Complete system including amplifier rack,
shaker, and Kimball horizontal slip table assembly*

This Ling Electronics electrodynamic vibration test system is a legacy solution designed for environmental, durability, and product qualification testing. Built to deliver reliable, repeatable vibration excitation, the system includes a high-power amplifier rack, electrodynamic shaker/exciter, and a Kimball horizontal slip table assembly for secure fixturing and accurate testing.

✓ SYSTEM HIGHLIGHTS

- ✓ Ling Electronics power amplifier rack
- ✓ Electrodynamic shaker / exciter assembly
- ✓ Kimball horizontal slip table / tooling platform
- ✓ Heavy-duty industrial base and fixture tooling
- ✓ Suitable for vibration, durability, and qualification testing
- ✓ Legacy test equipment available through
