

WAST WIZARD 120T

WATER SEPARATOR

- 4 cu. yd. water tank capacity.
- 4" max feed size.
- Heavy-duty steel tub with access doors.
- Automatic water-level control ($\frac{3}{4}$ " float valve).
- Heavy material conveyor – 1400 mm (4' 7") belt, 7.5 kW motor.
- Light material conveyor – 1600 mm (5' 3") belt, 3 kW motor.
- Water tank screw – 2 m (6' 7") length, 250 mm (10") diameter.
- Discharge screw – 3.7 m (12' 2") length, 250 mm (10") diameter.
- Quick-release cleaning doors.

The Waste Wizard 120T is a water separator recycling machine that separates light material from heavy material using a water filled tank.

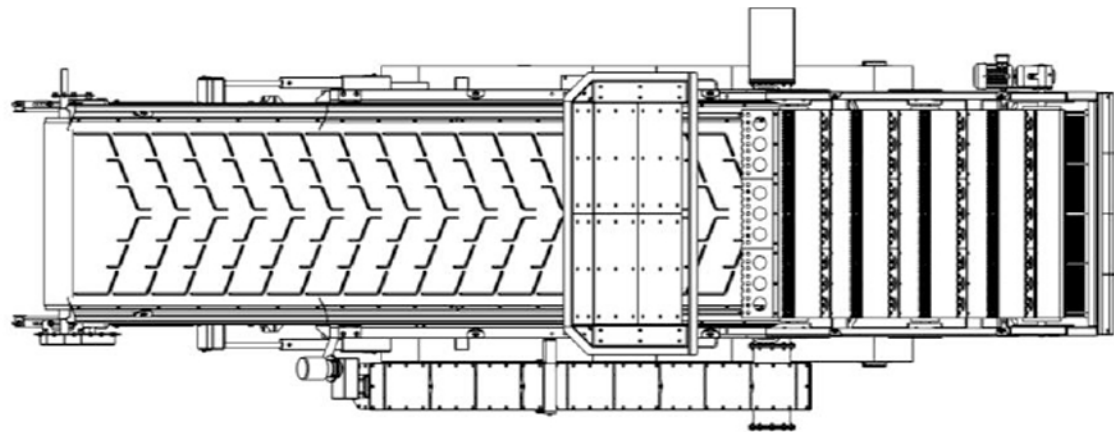

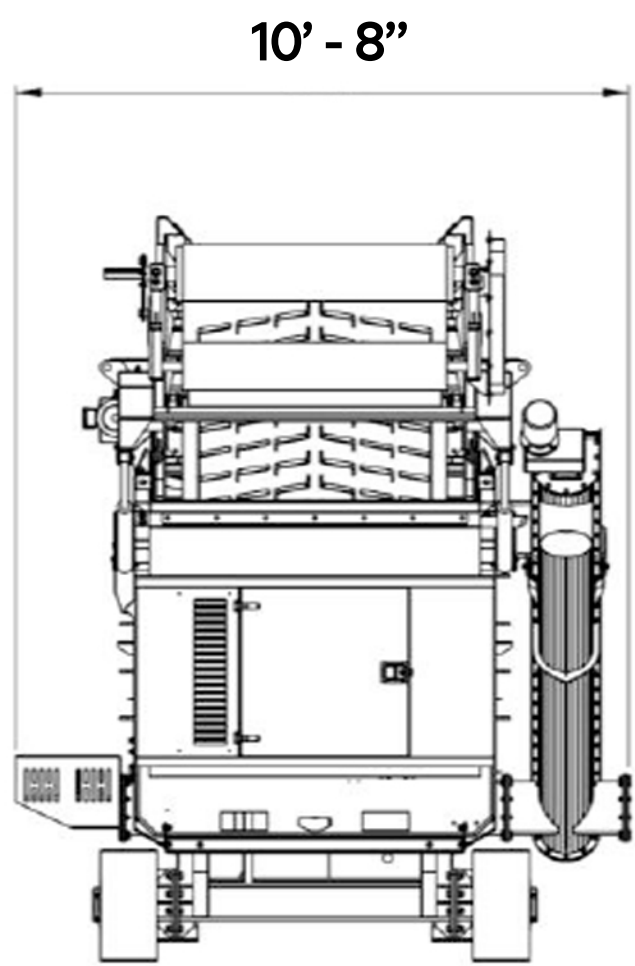

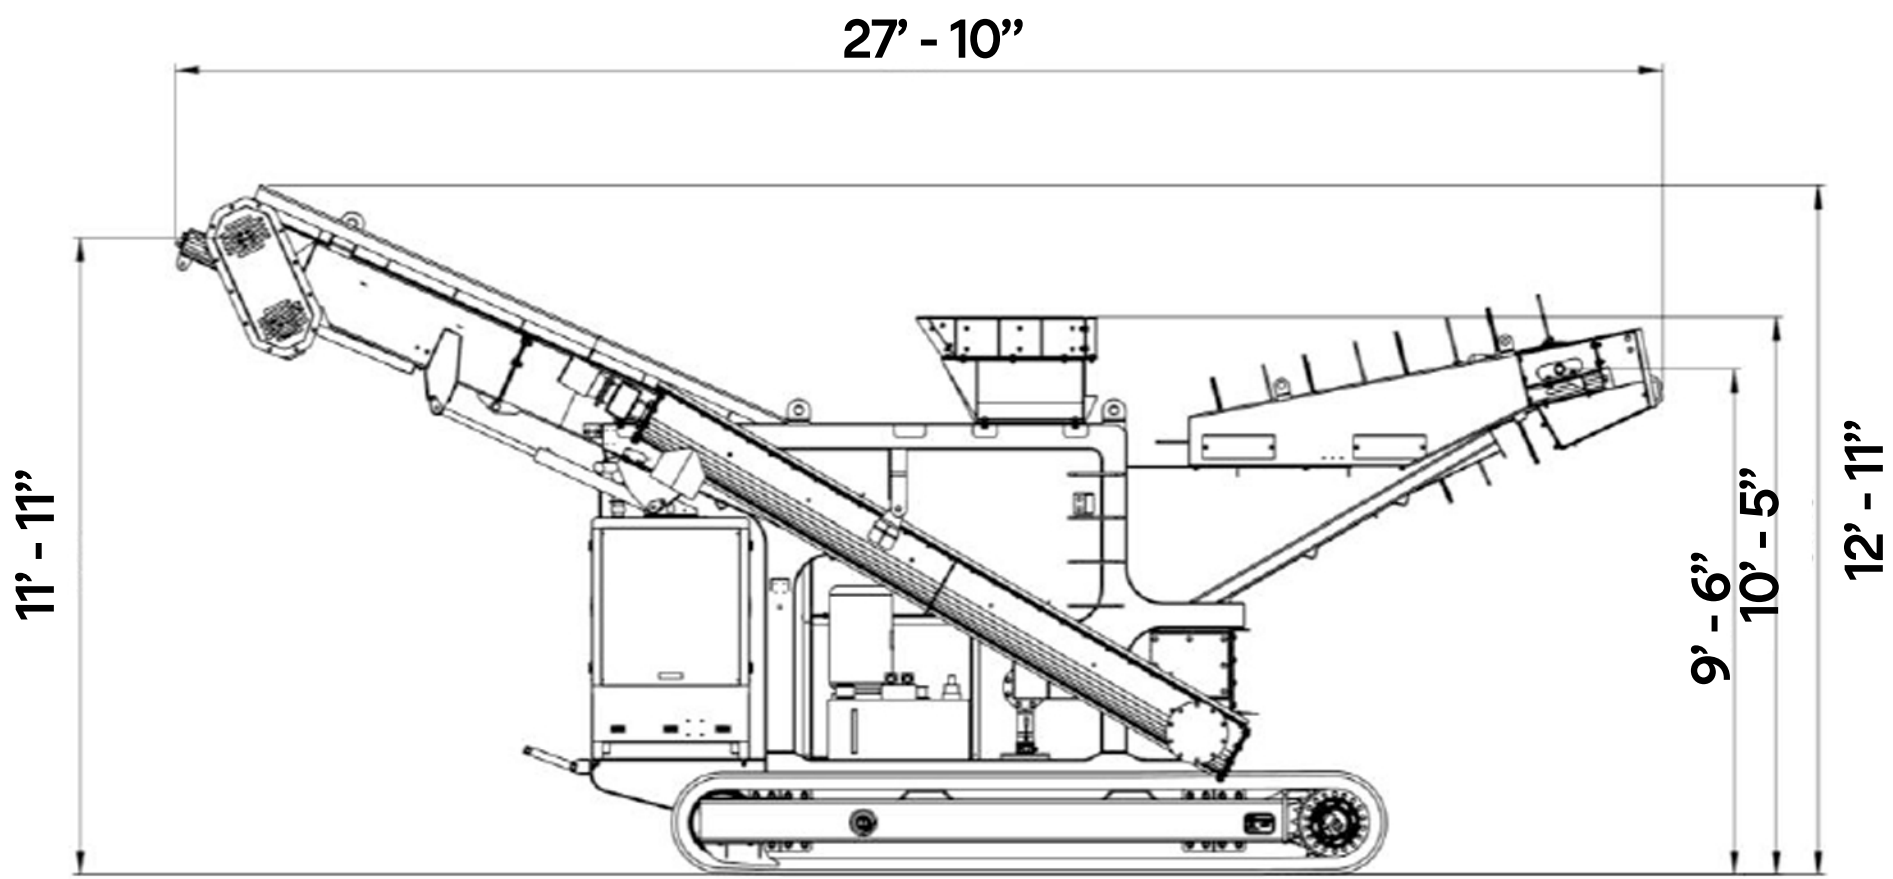

It's steel water bath features heavy and light material conveyors, a Hardox-lined feed chute, and automatic water level control.

A rotary brush cleaner and auger screw system efficiently remove sediment and keep the tank clean for consistent performance.

Transport Dimensions:
Length: 23'-11" Width: 7'-8"
Height: 10'-10" Weight: 25,573 lbs
