

Superior Performance in a Small Package

The low hopper on the 510 Cougar eliminates the need to build ramps and is wide enough to accept large buckets. The steep side walls and straight in feed of the conveyor stop the hopper from bridging.

Features:

- Attached conveyors
- 49 HP diesel engine (no California permit required)
- Quick change screens
- Optional radial stacking capability
- Low hopper, no ramps required
- Competitively priced
- Road legal
- Largest hopper in its class
- Capacity varies according to screen panel operating.
- Excellent service access
- Brushes adjust from ground level
- Made in USA

510 Cougar Trommel Screen

The controls on the 510 Cougar are well laid out and easy to operate. The drum and feed conveyor are reversible and all functions are variable.

Total access to the engine compartment takes the work out of servicing the unit.

The 510 Cougar has tensioned screen panels which provides a quick clean installation. Maximizing open screening area. The screen panels on the Wildcat Cougar can be changed quicker than any other trommel screen on the market.

The efficient brush design of the Cougar keeps the screen panels clear when screening wetter material. Brushes are adjustable from ground level.

The panels along the drum are easily removable to provide access to screen panels and collecting conveyor. The clearance between the trommel drum and collector conveyor is unsurpassed in the industry. The Cougar is designed to provide superior service access.

Engineering the most advanced Trommel in the industry!
