Increase Profits By Screening

Compost • Topsoil • Sludge • Yardwaste • Woodchips • And More!

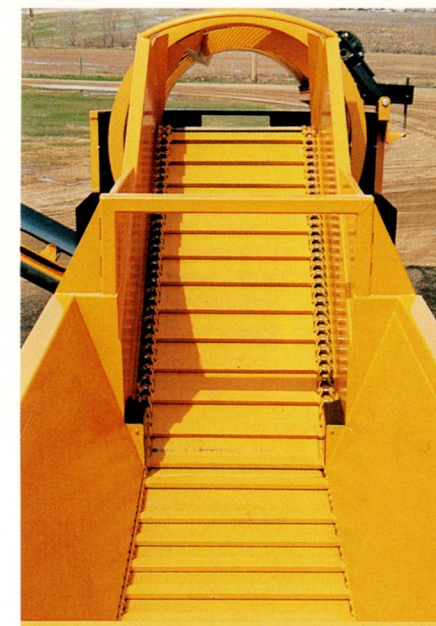

RHC 6-160 L: Trommel screen is totally portable with conveyors that stock pile material up to 13 feet high.

TROMMEL SCREEN

The demand for high quality compost is growing; so is the need to produce it in the most efficient manner. The Wildcat trommel screen provides these answers by removing unwanted material in a quick and affordable way.

Made with the same quality and dependability as our compost turners, Wildcat trommel screens set up in minutes and require no tools or other equipment.

Wildcat trommel screens are available in portable and stationary models and come in a variety of sizes. Wildcat means reliability, durability and customer satisfaction. For more information on a Wildcat trommel screen and how we can help you, call us at 1-800-627-3954.

Steep hopper sides with aggressive apron chain prevent material from "bridging."

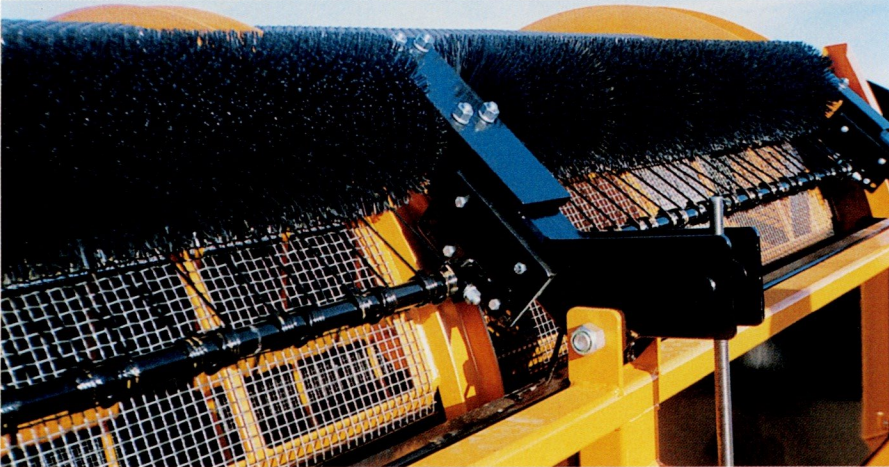

Lift angles and accelerator bars disperse materials evenly.

The RHC, with conveyors, stacks the compost.

FEATURES OF THE TROMMEL SCREEN

Grooming teeth rake material from brushes.

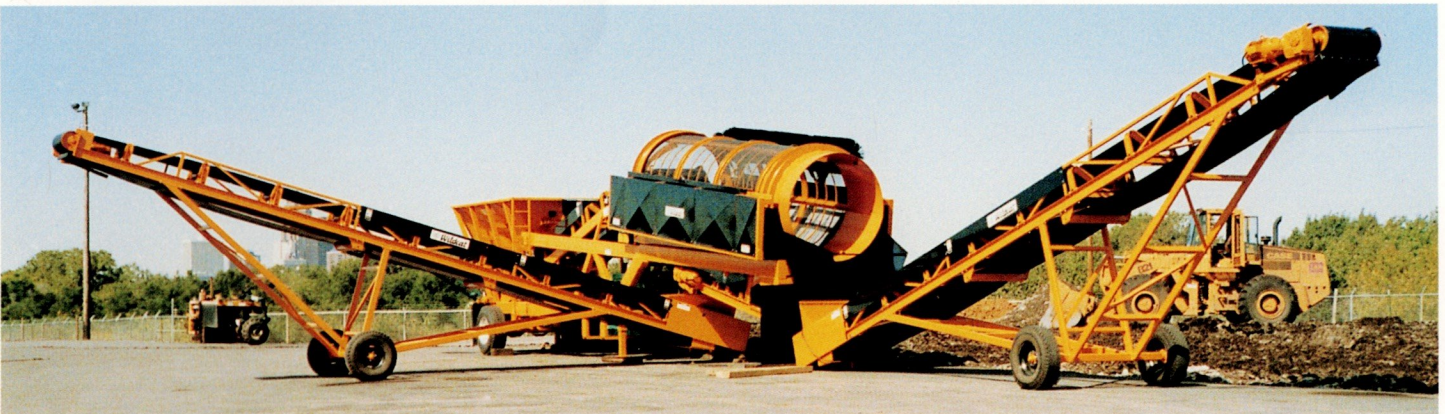

Optional pintle hitch for easy transportation.

Solid rubber tire drive for less maintenance.

Optional grizzly bars prevent large objects from entering the hopper.

RH series with optional conveyors for larger stock piles.
