

# TS-409

## THE **ULTIMATE** TOUGH SCREENING SOLUTIONS

IROCK's smallest scalping screening plant, the TS-409, is designed for low to moderate output, up to 300 TPH, in heavy-duty applications. The unit features a robust design for long life and is ideal for topsoil, mulch, sand and gravel, asphalt, coal, limestone and demolition debris.

TS-409

ENGINE	66.2-horsepower DEUTZ® TD 2011 L04 i (Tier 3)
HOPPER CAPACITY	5.02 cubic yards
STOCKPILE HEIGHT	11 feet, 6 inches
TOP DECK	9 feet by 4 feet
BOTTOM DECK	9 feet by 4 feet
DISCHARGE CONVEYOR	42 inches wide with impact bed
WEIGHT	37,500 pounds

## FEATURES

- ▶ A 42-inch-wide discharge conveyor stockpiles up to 11 feet, 6 inches for higher production before relocation becomes necessary.
- ▶ With a high-energy, two-bearing, 9-foot by 4-foot screen box, the TS-409 offers 72 square feet of screening area and the ability to sort up to three different product sizes.
- ▶ A heavy-duty, direct-feed system withstands a wide range of feed materials and allows the product to flow freely onto the screen.
- ▶ Three hydraulic, folding side conveyors allow easy transport and set-up times of 10 minutes or less.
