

The Royer 266 features a central grease system and is specially design with a sweep assembly for extra durability.

The Royer 266 is ideal for tractor loading and is perfect for medium and large scale operations. With a maximum input processing capacity of 60 cubic yards per hour, this machine will handle even the heaviest demand with ease.

### Typical Applications for the 266

Landscape Contractors  
Municipalities  
Organic Mulch Suppliers  
Golf Courses
