

The model DD 4800-DH increases productivity while reducing bark content, product handling time, and fiber loss.

The Peterson Pacific Corp. model DD 4800-DH multiple log delimeter/debarker is designed to out-produce your expectations! Utilizing innovations such as a patented floating upper flail, adjustable feed and flail speeds, and hydrostatic flail drive, the DD 4800 can produce at 40-60 U.S.tons per hour with a bark content of less than 1%. Capable of simultaneously processing logs from 2" to 23" (5.1 to 58.4 cm) diameter, this machine really produces. With a proven track record, this third generation design outperforms its competition by accepting a wider variety of wood sizes and shapes, requires less fuel per hour, less working space, operates with lower chain costs, and increases fiber yields by as much as 25% per acre!

GENERAL SPECIFICATIONS

Weight	32,000 lbs.(14,525.6 kg)
Tongue Weight	Approximately 7,000 lbs. (3,177.5 kg)
Length	20 ft. 9 in. (6.32 m) with tongue folded
Width	8 ft. 6 in. (2.59 m)
Operating Width	9 ft. 9 in. (2.97 m)
Height	9 ft. 6 in.(2.90 m)
Capacity	2 in. to 23 in. (5.1 cm to 58.4 cm) diameter
Feed Dimensions	23 in. x 48 in. (58.4 cm x 121.9 cm) wide
Maximum debarker chain	156 8-link sections
Tires	445/65R 25 L20 ply
Engine	Caterpillar 3306, 325 hp. Optional: Cummins LTA10, 325 hp.
