THE ULTIMATE SCREENING

6 0 0 0

Recycling

Red ash fines screened from industrial slag

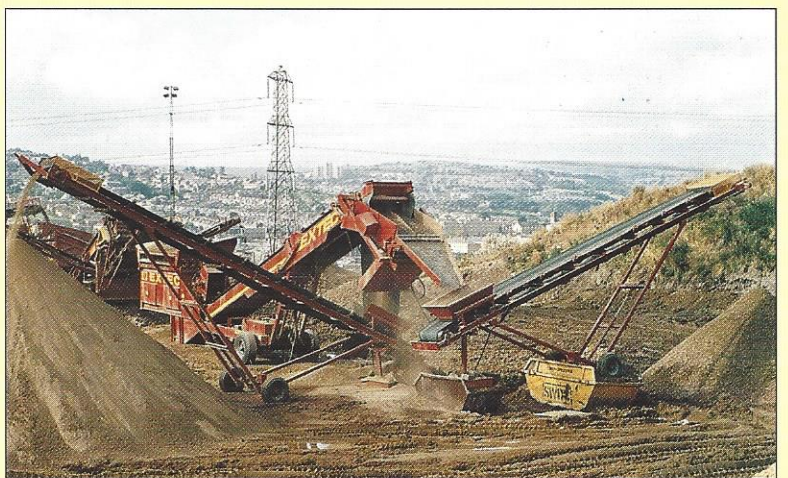

... vibrating hopper top for more valuable option.

Top Soil Production for a Golf Course

Application

EXTEC D65 Stockpilers. The hydraulic power from the 6000 can operate 3 stockpilers.

NG AND LOADING MACHINE

EXTEC Superior Four-Element Screen Unit

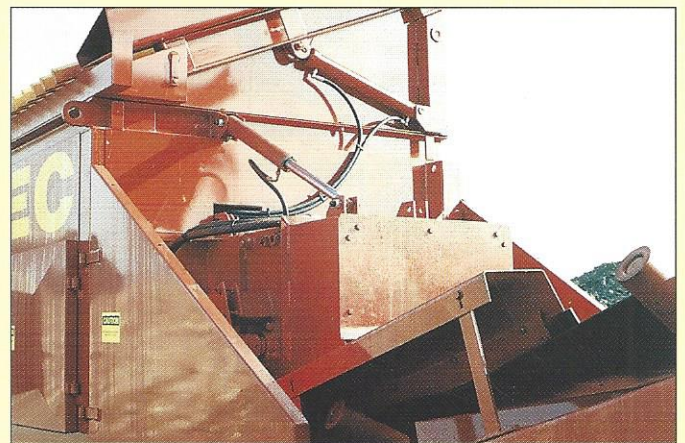

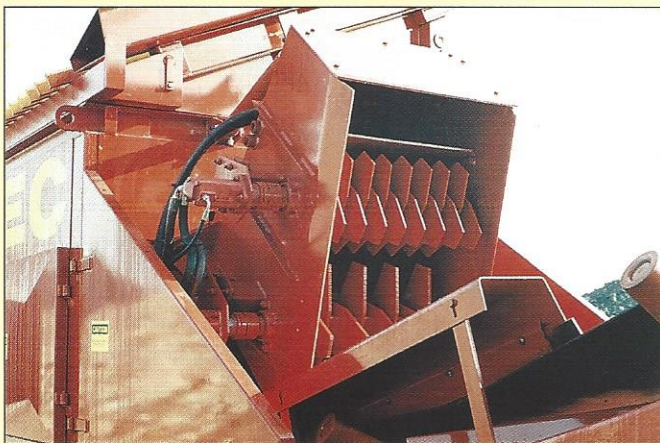

The most important part of a screening plant is the screen itself. EXTEC have developed the most unique type of screen on the market today.

The tension method gives the four screen mats an absolutely even and hard screen surface therefore achieving an impressive capacity and quality in production.

Top and bottom deck have individually different angles and the whole screen unit is hydraulically tilted to the desired angle for maximum production.

EXTEC Topsoil Shredder

A profitable option is this Shredder Unit for topsoil, compost and other applications can be easily fitted in the hopper outlet.
