

IMPAKTOR 250

Slow Speed Shredder

No other slow-speed shredder on the market can match the Impaktor 250 in **versatility and performance** at this size and price point. Shred concrete, waste wood, C & D, hard plastic, and much more from a single machine! **Special shaft** geometry positions material to be crushed, then secondary double jaw breakers, in conjunction with the breaker bars, help operators achieve a **final product size**. In short – the 220 horsepower Impaktor 250 is the most compact, most versatile slow speed shredder available today.

PRODUCE MORE

The Impaktor 250 is designed from the ground up to really produce. It's able to do this by being easier to transport, quicker to set up, and tougher on a variety of material you need to shred. The large volume hopper means less prep work to feed material, and compact dimensions means its easier to tow and position, weighing only 15 tons.

A MACHINE FOR YOUR LOCATION

Get your Impaktor 250 either as an electric stationary unit, or on a track undercarriage. Tracks make it easy to move and position at the job, or across difficult terrain, and the stationary setup makes it the perfect addition for indoor applications.

SHAFTS OPTIONS

The Impaktor 250 can be outfitted with either standard Impaktor shafts or the special paddle shafts, depending on the application. And the switch is relatively quick, taking only a few hours, thanks to the unique quick change cassette shaft system.

Hydraulic Tank:	18 Gallon	68 L

COMMITTED TO QUALITY & PRODUCTIVITY

Since 1983, Bandit has manufactured equipment for a multitude of wood waste processing markets. The vision since the beginning, is to build quality, highly productive, easy to maintain equipment providing years of dependable service.

The commitment for quality, innovation and dedication is instilled in every employee and is one of the main reasons why Bandit became an Employee-Owned Company (ESOP) in 2018. These core values ensure each Bandit machine will leave the factory ready to exceed your expectations.

QUICK CHANGE SHAFT SYSTEMS

Easy installation and quick removal of the shafts can be achieved with the quick-change shaft system. This system allows for quick removal of the shafts for easier maintenance, replacement, or refurbishment. Two different shaft options are available including shafts to process concrete or paddle shafts which are best utilized when processing waste wood and tires.

IMPAKTOR 250 FEATURES

- Hydraulic Motor**
 Hydrostatic drive with power regulated hydraulic motors
- Quick Change Shafts**
 Quick change shaft system for simple service and maintenance
- Remote Control**
 Remote control with emergency switch (extra spare remote provided)
- Discharge Belt**
 Discharge belt with over-belt magnet
- 2-Stage Crushing Process**
 2-stage crushing process with special shaft geometry, secondary double jaw breaker, and breaker bars
- Drive & Adjustment**
 Asynchronous drive with alternating adjustment of the shaft speed for smooth pulling of heavy material
- Short Setup Times**
 The Impaktor 250 can be set up in as little as two minutes and ready to work!

Bandit Offers a Complete Line of Tree Care Equipment:
 Hand-Fed Chippers • Stump Grinders • Whole Tree Chippers
The Beast® Horizontal Grinders • Track Carriers • Attachments
