

ErinTM STARS CREENER

THE ORGANIC SCREENER

SPECIFICATION SHEET

MODEL 300

SIDE ELEVATION IN TOWING POSITION

The Erin Starscreener 300 is a compact mobile organic screener capable of producing a high quality product from high moisture content organic material. The Model 300 features an 18' starbed, which allows considerably larger production—ranging from 50-75% more than the Erin Model 200. Expected production capacity

in compost ranges from 150 yd³/hr at 3/8" and 60% moisture content to 250 yd³/hr at 5/8" and 40% moisture.

The 18' starbed feeds a large fines stockpiler and wide reject stockpiler. A heavy duty shredder and a variety of hopper grid options are available.

SPECIFICATIONS

Length (operating)	46'
Width (operating)	26'
Loading Height	10'
Weight (approx)	32,000 lbs
Travel Width	8'6"
Travel Height	13'
Travel Length	37'
Engine	Perkins Diesel, 80 HP
Hopper Capacity	8 yd ³
Hopper Feed Belt	48" W x 13'11" L
Fines Stacker	30" W x 26' L, Chevron Belt
Fines Stockpiling Height	14'10"
Reject Stacker	42" W x 15'4", Chevron Belt
Reject Stockpiling Height	9'8.5"
Starbed (screening surface)	40" W x 18' L

Spacing of Stars	3/16" - 1-1/2" Range
Capacity Guideline (compost):	
Wet (3/8 minus, 60% moisture)	150 yd ³ /hr
Dry (5/8 minus, 35% moisture)	235 yd ³ /hr

OPTIONS

Engine	John Deere Diesel, 80 hp
Hydraulic Landing Legs	
Complete Electric Package	
Hydraulic Tipping Grid	
Remote for Tipping Grid	
Manual Tipping Grid	
Fixed Grid	
Double Shaft Rotor Chain Shredder	
Single Shaft Rotor Chain Shredder
