Diabolux Portable Traffic Lights

Scrolling lights without cables

Display countdown time remaining integrated into the yellow flashing light - the countdown informs drivers and prevents them from violating the red light sign.

Sturdy, ergonomic and easy to install.

It is valued by hundreds of users.

Composition:
- Black polypropylene signal head
- Orange polypropylene case
- Orange steel telescoping pole with tightening knob
- Red, yellow and green 210mm lenses with large wide angle high-intensity LEDs (lifetime of 300,000)

Easy handling:
• Proven electronics identical to previous model
• For use in four and three-way intersections (for private roads)
• Manual option: steady red or steady green light
• Maintains synchronization for 20minutes (when changing battery)
• Battery status indicator

Practical:
• Handles like a two-wheel hand truck
• Set of lights can be carried in any light commercial vehicle LCV
