POWERING BUSINESS. EMPOWERING PEOPLE

Mining projects, services & equipment

We are a mining contractor with strong roots in west Africa. The team at USP&E, through our alliance with DIG, has over 10 years experience working in Africa on civil infrastructure and mining projects, maintaining operations through the Ebola and the current Covid crisis. DIG is an agile business with low overheads and is able to respond quickly and competitively to bids, studies or work on the ground. The company's senior management is accessible and responsive and aim to work collaboratively with clients to help solve their challenges.

A history of responsible investment and effective utilisation of mining resources and equipment

USP&E has a history of involvement in African and company owned mining platforms with strong investments in multiple sectors.

We have a technically strong, professional and highly resourceful team and a well-maintained plant fleet able to mobilise quickly and fast-track construction of access corridors, mine infrastructure and facilitate early cash generation from mining.

About USP&E Mining

USP&E buys, develops, constructs, operates, and sells mining licenses and active mining concessions. We also offer a full suite of contract mining services to key mining clients. Together with our key partners, we have the experience, local know-how, resources and technical capability to offer results.

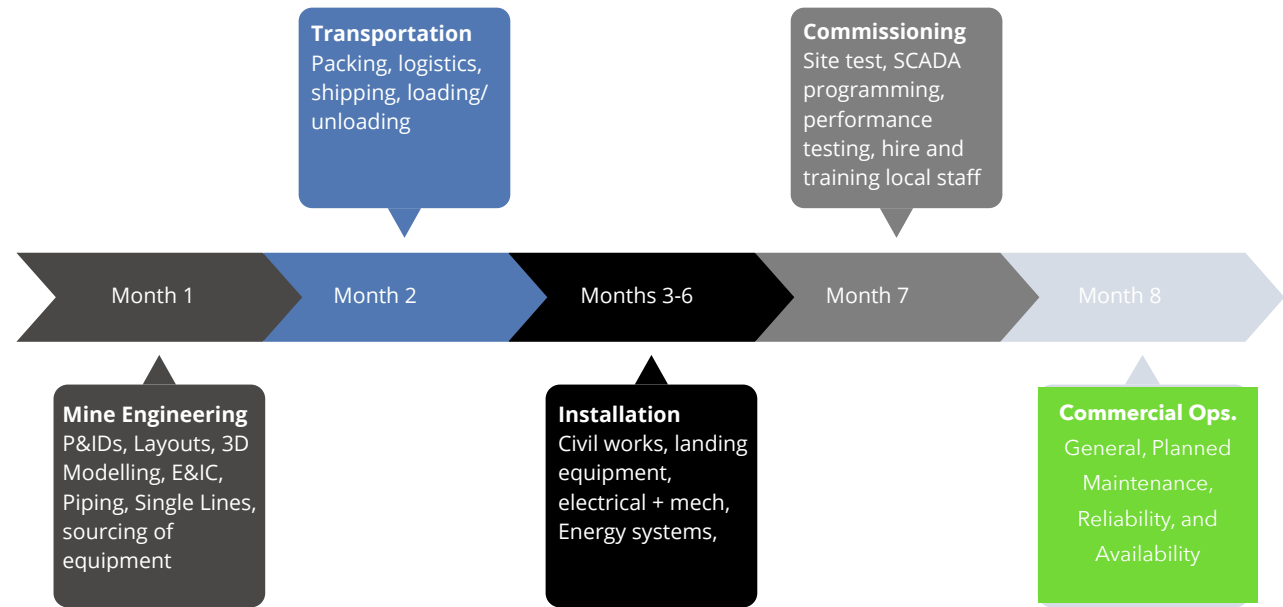

USP&E buys, develops, constructs, operates, and sells mining licenses and active mining concessions. Having successfully delivered mining and mineral export projects across Africa – USP&E has the experience, local know-how, resources and technical capability to offer results.

USP&E has the ability to advise on mine planning, and has recently been employed by Iluka on an Early Contractor Involvement scheme to plan and cost the next phase of mining at the Sierra Rutile mine in SL, where we are currently carrying out contract mining and mine infrastructure works.

Never lost a competitive situation on price. Can be very flexible, hit the ground and help make projects profitable early, and perhaps there are projects we could work on together in this regard.

We can fast track any mining project

We develop and bring to operational readiness mining projects faster than anyone in Africa. We reduce typical project times by more than half executing our fast track approach. Simultaneous preparation of site, procuring the equipment and finding the fastest shipping time so the plant is commissioned in the fastest possible time.

Full service solutions

We have the in-house capability to take on the full range of tasks required to develop, design, construct, commission, and operate mining facilities in any country across Africa.

We also offer:

Mining Equipment - new and used

O&M Services across Africa

Mine Development and Geological Resources

Mineral Trading Desk

METHODS

Underground
Open Pit
Surface Mining
In-Situ
Strip Mining
Quarrying

Construction

Building + Medium & Large Scale Mining Projects
Commitment to Safety
Fast Track Production Options

MINING EQUIPMENT

We manufacture and stock new and used mining equipment, process plants, mobile test labs, and earth moving equipment

Operation & Maintenance

We operate and maintain mining facilities across Africa
